[www.sirow.arizona.edu](http://www.sirow.arizona.edu)
The Southwest Institute for Research on Women (SIROW) was founded in 1979 as a regional research and resource institute in the University of Arizona’s College of Social and Behavioral Sciences. SIROW is dedicated to improving the well-being of women and girls, their families, and the communities in which they live.

It is SIROW’s belief that SIROW and its partners can make positive social changes at individual, familial, community, and structural levels by …

- challenging the status quo,
- facilitating the voices of those who experience disparity,
- working with diverse groups of female-, male-, and transgender-identified individuals, and
- seeking innovative methods based on research, best practices, and theory to improve conditions and contexts.

SIROW faculty, staff, and students work locally, nationally, and globally to effect positive social change. SIROW’s partners in these efforts include University of Arizona colleges and departments, other institutions of higher education, schools, Native American tribes and communities, governmental agencies, community-based organizations, and community members.

Taking a holistic approach to well-being, SIROW’s interdisciplinary and intersectional community-based research and action projects focus on addressing correlated and co-occurring social and public health issues in the areas of …

- health and wellness (e.g., relationship and sexual health, substance misuse, mental health, and homelessness),
- legal issues (e.g., juvenile justice, legal advocacy, domestic violence, and immigration),
- education and employment (e.g., literacy, leadership, access, and workforce development), and
- women’s history and the arts (e.g., representation of women, diversity of voices, and oral history).

SIROW’s work is guided by its values of respect, collaboration, strength-based approaches, appreciation of diversity, investment in community, and passion for a more equitable world. Based on these values, SIROW shares its unique expertise in …

- research methodology,
- program design, implementation, and program evaluation,
- collaborative partnerships to increase community capacity, infrastructure, and advocacy, and
- training, technical assistance, and workforce development.

Through these efforts, SIROW strives to contribute to a more just and equitable society for all.
Vision
A society in which the well-being of women and families is paramount, resulting in their equity, empowerment, and prosperity.

Mission
Develop, conduct, and disseminate collaborative outreach, education, intervention, and research projects of importance to diverse groups.

Goals
- Engage in collaborative feminist research on topics pertinent to the lives of girls, women, and families.
- Develop and conduct outreach, education, service, research, and trainings with regard to mental and physical health, sexuality, legal matters, education, workforce, equity, diversity, and other issues.
- Address social inequalities and group-based disparities.
- Examine and support women’s contribution to literature, the arts, and Southwest heritage.
- Advocate for women and families by linking researchers with community organizations and policy makers.
- Identify, illuminate, and disseminate research on girls, women, families, and gender differences.
Initiate new projects that are responsive to current and emergent social inequities and group-based disparities.

Broaden SIROW’s funding base for new projects by securing funding from at least three new funding sources.

Develop a holistic marketing strategy for SIROW.

Implement strategies to increase visibility of SIROW.

Disseminate information about SIROW projects, accomplishments, findings, and impact.

Contribute to the teaching missions of the University of Arizona (UA) and the College of Social and Behavioral Sciences.

Influence research and policy agendas through involvement in university, local, and national decision-making organizations.

Further expand the contribution of SIROW’s expertise in program design, implementation, and evaluation.

Create new and maintain existing partnerships.

Utilize the SIROW and Women in Science and Engineering (WISE) Community Advisory Boards to engage allies.

Utilize the SIROW Regional Partner Group to engage allies.

</table>
Stakeholder Input

The following pages provide a summary of the stakeholder input regarding SIROW’s strengths, challenges, opportunities, and vision for the future.

STRENGTHS

SIROW is deeply rooted in the local and global community. Community partners report that SIROW connects the UA to diverse groups of people and organizations through creative partnerships. These partnerships help to identify and fill important gaps in community need and, through these partnerships, SIROW contributes to making Tucson a safer, more prosperous, healthier place to live as well as a more attractive place for students and faculty. SIROW has over 100 collaborators at the local, national, and global levels. These organizations include many not-for-profit organizations serving marginalized groups, such as mental health and substance use treatment providers, as well as organizations in the fields of medicine, law, family services, education, homelessness, and workforce development. SIROW has also partnered with community groups—such as Native American tribes, the City of Tucson, and the City of South Tucson. SIROW’s university and researcher partners include, for example, Research Triangle International, Arizona State University, and University of Yangon in Myanmar. Stakeholders felt that SIROW “really gets in and works with the community.” These community partners see SIROW as being independent from the university and a more trustworthy collaborator. One stakeholder noted that sometimes, “the UA seems like the elephant that can crush you – SIROW helps bring it back down to the community. It gives us a more positive view of the university.”

These community connections are viewed as having a positive impact on families, communities, women, men, children, youth, and elders, which is in line with SIROW’s mission. SIROW is well-known for its work on issues related to sexual health; criminal justice; gender; lesbian, gay, bisexual, transgender, and queer/questioning plus (LGBTQ+) identity, mental health; substance abuse; violence; and STEM. SIROW identifies and addresses community needs through programming and partnerships with community-based programs and agencies, such as the Southern Arizona AIDS Foundation’s (SAAF) EON Youth Lounge, the Pascua Yaqui tribe’s Sewa Uusim Behavioral Health Program, CODAC Health, Recovery & Wellness, and the Pima County Health Department. SIROW is a leader in the Southwestern United States among research institutes of its type and a model for applied research that has an immediate impact in the community. SIROW connects the UA to the community in a unique and powerful way—through research, program development, convening, creative partnerships, and student engagement—with lasting positive impact.

SIROW is inclusive and respectful of diverse cultures. Stakeholders express that they have felt heard while working with SIROW and that the voices and perspectives of the people served by SIROW projects are included in research methodology and results. The methods implemented by SIROW are culturally sensitive and accessible. As one stakeholder noted, “My experience is that
SIROW researchers are effective grant writers. According to one UA stakeholder, “SIROW is the largest grant-getting unit in the College of Social and Behavioral Sciences, consistently funding employment for over twenty researchers.” Another stakeholder noted that SIROW researchers are prolific at generating grant proposals that support the community by helping community-based organizations obtain grant funding. SIROW’s grant-funded work builds on itself: get a grant and do the research and use the research to justify the next grant. One stakeholder noted that, “It is a strength that SIROW faculty are not tied to the

SIROW is the largest grant-getting unit in the College of Social and Behavioral Sciences, consistently funding employment for over twenty researchers.

In terms of dollars for social welfare and programs, people today want evidence-based programs. No longer can you say anecdotal information. If you want your program to do well, if you want to apply for grants, you must show the data behind it. SIROW provides this and it’s a big value to the overall community.

The data collected is very usable and practical, grounded in the programs, helps us get better.

SIROW Strategic Plan 2019-2023
40-40-20 rule in teaching, research, and service. It enables them to focus on these projects, on bringing in more funds.” This also eases pressure to publish at a high rate in traditional scholarly journals and, instead, focus more on application of research to practice. SIROW is focused on its mission and finding answers.

SIROW provides value within the UA community by supporting students and university goals. SIROW has partnered on critical applied research projects with over 30 UA units, including, for example, Department of Mexican American Studies, College of Agriculture & Life Sciences, Department of Psychology, Immigration Law Clinic, College of Engineering, School of Sociology, Water Resources Research Center, and Campus Health. SIROW engages undergraduate and graduate students in these projects, providing a wealth of diverse interdisciplinary and interprofessional training experiences. Stakeholders report that SIROW is uniquely positioned and experienced to fulfill the promise of the UA as a land-grant university—to benefit Arizona communities, to expand educational opportunities, and to help to address important societal concerns. SIROW aligns perfectly to the College of Social and Behavioral Sciences’ commitment to community education and outreach. One stakeholder noted, “SIROW really grounds the College of [Social and Behavioral Sciences] in the true meaning of a land grant university. It was really one of our first community outreach programs and we need to make sure both the UA and Tucson community know about its research and community impact.” SIROW defines community engagement.

CHALLENGES

When asked about the challenges facing SIROW, stakeholders were united in their response: visibility and branding. SIROW has an outstanding reputation among people who know it. However, too few people know about it or understand the breadth and depth of SIROW’s work. Although SIROW’s researchers are widely respected locally and internationally, they are often marginalized in the university community due to the misconception that their work is not “academic enough.” Faculty and leaders at the UA do not always think highly of applied social science or even think of it as science. Relative to other research groups, university stakeholders report SIROW is not well integrated with the academic faculty. One stakeholder reported that, “My colleagues in pediatrics have not heard of [SIROW]. But everything we are discussing [regarding SIROW’s work] has direct impact on pediatric, psychiatric issues.” While another noted that, “I hear people say the UA should be doing this or that and it’s something SIROW does. People don’t know.” To help address this issue, stakeholders would like to see SIROW invest in a project manager to work across SIROW projects to help manage administrative tasks for the principal investigators and SIROW, such as convening meetings and connecting potential partners to SIROW experts.
Stakeholders point to messaging as one culprit for the lack of SIROW’s visibility. They report that SIROW’s communications materials, such as the annual report, newsletters, and other materials, could be presented in a more accessible, engaging, and professional way. One stakeholder noted that the mission statement feels outdated. Some stakeholders reported concerns about the name, asking, “I’m not a woman. Is this for me?” or “My program doesn’t exclusively focus on women, will they work with us?” In addition, “Southwest” makes SIROW seem limited in geographic scope. SIROW’s identity is further complicated by its ties to and history with the UA Department of Gender and Women’s Studies (GWS). Stakeholders suggest that there is a divide between SIROW’s focus on practice and GWS’s focus on theoretical work that complicates others’ views of SIROW.

As an institute that is primarily funded by grants and contracts, SIROW struggles to articulate its value to the university and donors. Fundraising and competition for grants is a challenge. In addition to the challenges of obtaining grant funding, stakeholders note that SIROW leaders are not specifically trained in fundraising nor do they have time to prioritize this essential work. These financial challenges are further complicated by the substantial indirect cost rate the UA charges to grants and contracts and funders’ reluctance to fund such substantial indirect costs.

**OPPORTUNITIES**

Stakeholders see a great deal of opportunities for SIROW to grow over the next three to five years. In order to grow, stakeholders suggest that SIROW work more closely with the College of Social and Behavioral Sciences Development Office and Marketing and Communications to better promote their work. As one stakeholder noted, “They need to brag more about what they do. They need to make sure people know how many grants they’ve done, how many clients they’ve had. They need to really market themselves.” Another stakeholder noted, “SIROW has a lot to offer the College of [Social and Behavioral Sciences] in the fundraising realm. It’s a great flagship program to show off to donors. SIROW should get on the radar of the Development Office and help them see their value.” Similarly, stakeholders recommend that SIROW consider new avenues to increase SIROW visibility but also to grow diverse funds and increase its contribution to the UA and the College of Social and Behavioral Sciences. These could include establishing an applied master’s program and developing SIROW courses, where SIROW researchers teach in addition to their research pursuits. SIROW could engender support from the College of Social and Behavioral Sciences for grant writing. This support could be especially helpful when seeking new types of funding, like funding from the National Science Foundation. Stakeholders also suggest that SIROW further develop its ability to raise private philanthropic funds. These efforts could be further bolstered by increasing their relationships and collaborations with other departments across the university, including the Colleges of Medicine and Science. There is also opportunity to build additional community collaborations by building on the foundation of former SIROW work. For example, new community partners might have interest in expanding the work created through the ANCHOR Project, a project that collaborated with CODAC’s Living Out Loud program and SAAF to bring housing and mental health services to LGBTQ+ young adults and adults experiencing housing instability. Stakeholders suggest bringing in new collaborating partners to expand this work and sustain it.

*They need to brag more about what they do. They need to make sure people know how many grants they’ve done, how many clients they’ve had. They need to really market themselves.*

*SIROW has a lot to offer the College of [Social and Behavioral Sciences] in the fundraising realm. It’s a great flagship program to show off to donors. SIROW should get on the radar of the Development Office and help them see their value.*
FUTURE VISION

SIROW stakeholders are full of ideas for SIROW’s future. In order to increase SIROW’s visibility and make its brand more in line with its current work, stakeholders suggest that SIROW hire professional marketing assistance and work more closely with the College of Social and Behavioral Sciences Development Office and Marketing and Communications. This assistance would serve to cultivate a greater social media presence and to better utilize newsletters, a blog, and YouTube to tell SIROW’s story. Stakeholders also suggest that SIROW begin developing regular public service announcements, develop public trainings, and host more events, such as speaker series on aspects of SIROW’s research to make their research more accessible to the public. They also recommend that SIROW leaders have time allocated to networking and bringing attention to current and future research opportunities.

Stakeholders suggest that SIROW continue to prioritize critical community and interdisciplinary collaborations, including those with UA faculty and undergraduate and graduate students. Student engagement could be strengthened through teaching and internships, as well as more professional development, internal training, and support for up and coming researchers. Stakeholders recommend systematic, concerted efforts to network and build relationships across the university in order to find opportunities for collaboration, for example with the Frances McClelland Institute and the Colleges of Public Health, Law, and Medicine, but also with community organizations like the YWCA and El Rio Health, a local community health center. New diversified collaborations might also serve to bolster fundraising opportunities.

To diversify and increase funding, stakeholders recommend an increase in private fundraising from foundations like the Ford Foundation, Bill & Melinda Gates Foundation, and the MacArthur Foundation. Stakeholders also suggest that SIROW seek more investment and involvement from the Social and Behavioral Sciences Development Office to support efforts to identify potential donors and to fundraise. SIROW could also consider increasing its contribution to the College of Social and Behavioral Sciences’ teaching mission in order to generate more revenue from student tuition.

Stakeholders also suggest diversification of involved stakeholders as well as continued diversity of research focus. Stakeholders advise SIROW to diversify SIROW’s Community Advisory Board, especially regarding youth and culture, and to consider community partners as potential board members. Programmatically, stakeholders would like to see SIROW do more work on issues surrounding mental health and stigma and possibly a bigger focus on professional development for kindergarten through 12th grade (K-12) educators.
Consultant Recommendations

Consultant recommendations are based upon stakeholder interviews and focus groups, as well as conversations with SIROW staff and leadership.

SIROW’s reputation in the College of Social and Behavioral Sciences, the UA at large, and among nonprofit collaborators is excellent, despite the fact that broad-scale visibility is low. The SIROW name may be a contributing factor and should be thoroughly considered.

Visibility, messaging, public relations, marketing, and fund development are clear opportunities for growth and development for SIROW. I recommend developing and implementing a marketing plan with the help of professional counsel. SIROW’s position in the College of Social and Behavioral Sciences is strong and SIROW should ask for a budget increase as well as more assistance from the College of Social and Behavioral Sciences Development Office and Marketing and Communications. SIROW needs to create and grow a fund development strategy that includes endowment building.

Collaboration building was a big theme throughout the information gathering process, particularly collaboration outside of the College of Social and Behavioral Sciences and with the College of Medicine.

SIROW should consider teaching as a means of engaging more students and increasing tuition-based revenue. SIROW might also consider an applied master’s program in conjunction with the Department of Gender and Women’s Studies or another UA unit. SIROW should also consider growing student engagement by increasing student scholarships, research opportunities, and grants.

SIROW needs to devote time to creating and implementing a networking strategy within and outside the university.

Earned revenue may be a big opportunity for SIROW. Services and fees should be examined with an eye toward increasing earned revenue.
Methodology

SIROW engaged in a collaborative strategic planning process in the fall of 2018 with Alexander | Carrillo Consulting facilitating and guiding the process.

The goal of this process was to solicit input into the future direction of SIROW from SIROW staff, leaders in the UA College of Social and Behavioral Sciences, and organizations with whom SIROW has partnered.

Stakeholder feedback was obtained through four one-on-one interviews with UA College of Social and Behavioral Sciences’ leaders, two focus groups (one with SIROW staff, one with SIROW partners), and a survey of stakeholders.

After the consultant collated and organized the feedback, SIROW staff met for a four-hour retreat to process and discuss stakeholder input and to generate goals, objectives, action steps, and metrics. The consultant then worked with the SIROW Strategic Planning Committee to refine that information and create this plan document.

The draft plan was reviewed and further refined by the SIROW Steering Committee and the SIROW Community Advisory Board.

Questions asked of Stakeholders

What are SIROW’s strengths?
- What makes SIROW unique?
- What does SIROW offer that is distinct from other research institutes?
- In what ways is SIROW already advancing?
- What makes people care about/invest in SIROW?
- What is SIROW’s value? To the university? To the community?
- How is SIROW’s value made public/communicated/marketed?
- What influence/reach/impact does SIROW have/make? On campus? In the community? In other arenas?

What challenges does SIROW face?
- What are the barriers that keep SIROW from achieving its goals/mission?
- In what ways is SIROW stuck (in the past)?

In what ways can SIROW improve?
- What does SIROW need to grow stronger as an institute?
- What types of collaborations should SIROW seek to grow?
- What research avenues should SIROW consider pursuing?
- What ideas do you have for increasing both internal and external funding?
- What other resources does SIROW need to improve?
- What should SIROW continue doing, do differently, or stop doing in the next three years to break new ground and remain effective?
- How can SIROW better communicate/market its value? On campus? To the community? Nationally/globally?
- What other ideas do you have to help further SIROW’s ability to grow and improve?
Acknowledgements

Thank you to all of the people who participated in the strategic planning process by providing their input and ideas, leadership, and coordination. This strategic planning process, like everything else we do at SIROW, was a collaborative process supported by many.
