

**Research Brief Series II:  
Harassment & Abuse of  
LGBTQQ Individuals in AZ**

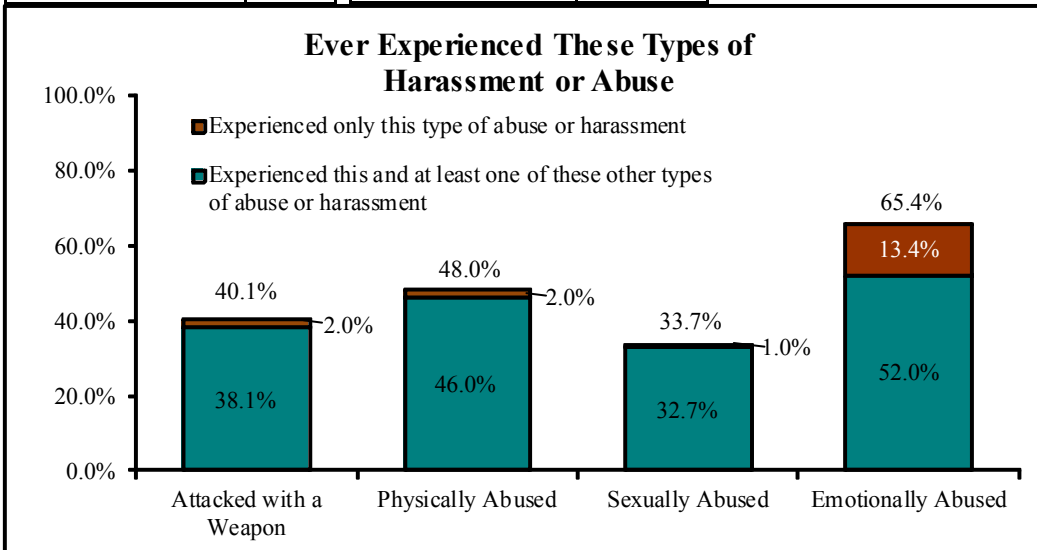

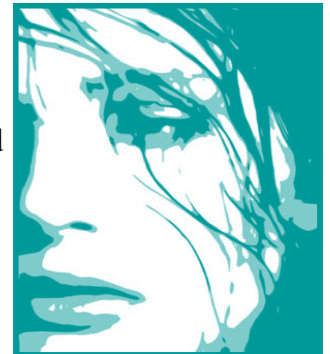

**Brief E: LGBTQQ Adolescents &  
Young Adults in the iTEAM Project**

The [University of Arizona-Southwest Institute for Research on Women’s \(UA-SIROW\) iTEAM Project](#) (My Treatment Empowerment for Adolescents on the Move) was a systems approach to drug/alcohol and mental health treatment for homeless LGBTQQ young individuals and their straight allies. There were 182 adolescents and young adults enrolled in the iTEAM Project who self-identified as LGBTQQ and who reported information regarding harassment and abuse.

Last Time Attacked or Abused	
Never	12.6%
> 12 months ago	39.6%
4-12 months ago	14.8%
Within past 90 days	32.4%
Not reported	0.5%

Number of Past 90 Days Attacked or Abused	
0 days	67.0%
1-5 days	19.2%
6-10 days	4.9%
> 10 days	4.9%
Not reported	3.8%

- Most (86.8%) of these young people had been attacked or abused.
- Many (32.4%) had been attacked or abused in the past 90 days.
- A significant percentage (9.9%) had been attacked or abused during more than 5 of the past 90 days.

Percentage Who Ever Experienced These Four Types of Harassment/Abuse	
None of the four types	16.5%
One of the four types	20.3%
Two of the four types	23.1%
Three of the four types	19.2%
All four of the four types	20.9%

- The rates of victimization within this group of young people are high.

- The majority (65.4%) of these young people have been emotionally abused, about half (48%) have been physically abused, 40% have been attacked with a weapon, and 34% have been sexually abused at some point in their lives.
- Most of those who experienced physical or sexual abuse or who were attacked with a weapon also experienced at least one of the other types of abuse at some point in their lives. Among the 65% who experienced emotional abuse, there was less overlap—13% of the 65% reported not experiencing any of the other types of abuse.
- Four in five (83.5%) of these young people experienced at least one type of abuse at some point in their lives.
- Six in ten (63.2%) experienced multiple types of abuse during their lifetime, with two in ten (20.9%) experiencing all four types of harassment or abuse.

Korchmaros, J. D., & Stevens, S. (2015, March). Harassment & abuse of LGBTQQ individuals in AZ: LGBTQQ adolescents & young adults in the iTEAM Project (Research Brief No. II.E). Tucson, AZ: University of Arizona, [Southwest Institute for Research on Women](#).  
Data from this project is not representative of all LGBTQQ adolescents and young adults in AZ.
